

BRIDGE *to* BIO

Bridge to Bio is an immersive residential program connecting Virginia community college STEM students with rewarding careers in biopharmaceutical manufacturing, with the goal of increasing the pool of diverse, talented engineers interested in the biopharma industry.

January 7-9, 2026

Presented by the University of Virginia Department of Chemical Engineering

PROGRAM BENEFITS

- Learn the basics about bioprocess engineering and biopharmaceutical manufacturing
- Understand the pathway to a rewarding career in biopharma
- Discover the career opportunities a B.S. degree in chemical engineering from UVA provides
- Gain valuable connections to academic and industry mentors
- Learn about internship opportunities with leading biopharma companies
- Visit a local biopharmaceutical manufacturing site

PROGRAM DETAILS

- Participants will receive free lodging and meals, and travel to and from Charlottesville will be reimbursed.

PRIORITY APPLICATION DEADLINE

December 1, 2025
