Introduction

ENGINEERING

Department of Mechanical and
Aerospace Engineering

- **Aerospace engineers design, develop, test, and produce aircraft, spacecraft, propulsion systems, satellites, missiles, and related systems and equipment, and solve problems in advancing atmospheric and space flight, with two major and overlapping branches: aeronautical engineering and astronautical engineering. They develop leading-edge technologies and integrate them into aerospace vehicle systems used for transportation, communications, exploration, and defense applications.**
- **Examples of career opportunities: Aerospace engineers work primarily in the aerospace industry, at systems and software suppliers, corporate labs, government labs, and universities. The skill set of aerospace engineers is extremely broad and multidisciplinary, and the experience of aerospace engineers as systems architects and engineers allows them to make contributions in many diverse sectors.**

UNIVERSITY
of VIRGINIA

Our Mission

ENGINEERING

Department of Mechanical and
Aerospace Engineering

- Our curriculum provides a broadbased education in the core disciplines and integrative systems of aerospace engineering, including aerodynamics, structures, propulsion, dynamics and controls, computation and software.
- We combine comprehensive coursework, extensive hands-on, practical experiences, and team projects to emphasize learning and discovery, ethics, leadership, and communication skills.
- Students also gain valuable fundamental knowledge about emerging fields such as unmanned air systems and autonomous vehicles, hypersonics, aerospace materials, and wind energy.
- Our graduates are trained to become future leaders in an ever-evolving, critical industry, and who will go on to make a positive impact on global society and contribute to programs of national importance.

MAE Summer UG Research Program

Professor Haibo Dong, Program Director

MAE Summer UG research program

- ✓ **The MAE department offers 8-10 weeks Summer Undergraduate Research Program (SURP) experience for undergraduates wanting to build their skills as young researchers.**
- ✓ **As a summer research assistant, you will be immersed in research opportunities. You'll gain valuable experience in the lab and work closely with your mentor on a research project designed specifically for summer students.**

MAE Summer UG research program

Examples of research topics from Summer 22

- ✓ **Applied biomechanics**
- ✓ **Autonomous drones**
- ✓ **Human Robot Collaboration for Assembly Work**
- ✓ **Bio-inspired design and flow physics**
- ✓ **Scramjet design for highly maneuverable hypersonic vehicles**
- ✓ **Thermal imaging and image processing**
- ✓ **Design and modeling of a Tesla turbine**
- ✓ **Wearable Textile Systems for Health Monitoring and Human-Robot Interaction**

Aerospace Engineering Curriculum

2nd Year

THIRD SEMESTER			FOURTH SEMESTER		
		credits			credits
APMA 2130	Ordinary Differential Eq.	(4)	APMA 3140	Applied Partial Differential Eq.	(3)
MAE 2030	Intro to Aerospace Engr	(2)	MAE 2100	Thermodynamics	(3)
MAE 2040	Computer Aided Design	(1)			
MAE 2300	Statics	(3)	MAE 2310	Strengths of Materials	(3)
PHYS 2415	General Physics II	(3)	MAE 2320	Dynamics	(3)
PHYS 2419	General Physics II Workshop	(1)	MAE 2330	Mechanics Laboratory	(2)
STS 2XXX/3XXX	STS Elective ⁴	(3)	_____	Unrestricted Elective 1 ⁵	(3)
	Total	(17)			(17)

3rd Year

MAE 4xxx	Aerospace Design I ⁶	(3)	MAE 4xxx	Aerospace Design II ⁶	(3)
STS 4500	STS and Engineering Practice	(3)	STS 4600	Engineer, Ethics, Prof. Resp.	(3)
MAE 4120	Propulsion	(3)		Math-Science/Tech Elective 2 ⁷	(3)
	Math-Science/Tech Elective 1 ⁷	(3)		HSS Elective 3	(3)
	HSS Elective 2	(3)		Unrestricted Elective 3 ⁵	(3)
	Total	(15)			(15)

4th Year Design Projects

- Synthesize learning to design, build, and test an aircraft or spacecraft
- Emphasis on learning and applying state-of-the-art conceptual aircraft design tools
 - NASA: Open Vehicle Sketch Pad (OpenVSP); Flight Optimization Performance System (FLOPS)
 - MIT: XFOIL; XROTOR; Athena Vortex Lattice (AVL)
 - FlightStream; GasTurb; AAA; SolidWorks, etc.
 - Additional tools depending on design challenge

4th Year Aero Design Projects

The Design Challenge is based on the annual AIAA Aircraft Design Technical Committee's (TC) Design Competition Request for Proposals (RFP)

<https://www.aiaa.org/get-involved/students-educators/Design-Competitions>

The screenshot shows the AIAA website's "Design Competitions" page. The header features the AIAA logo with the tagline "INSPIRING THE FUTURE OF AEROSPACE" and navigation links for "EVENTS & LEARNING", "GET INVOLVED", "PUBLICATIONS", "NEWS", "ADVOCACY", "CAREERS", and "MEMBERSHIP". The main heading is "Design Competitions". Below this, a breadcrumb trail reads "Home / Get Involved / University Students". The main content area includes a paragraph: "The AIAA Foundation sponsors design competitions every year. These competitions offer a great opportunity for students to participate in a simulated real-world problem, allowing students to gain experience and receive useful and constructive feedback from technical experts who sit on AIAA Technical Committees." To the right of this text is a photo of a team of students in formal attire, with a caption: "Team Aerospace Excellence at Miami, 3rd Place Graduate Team Aircraft Design, 2020". Below the main text is another photo of a team standing in front of an aircraft, with a caption: "Team Space Aerial Blue (University of Hawaii), 2nd Place Graduate Team Aircraft Design." To the right of the main text is a section titled "In This Section" with a list of links: "Student Branches", "Scholarships & Graduate Awards", "Careers in Aerospace", "Student Conferences", "Design Competitions", "Design/Built/Fly Competition", "Diversity Scholars Program", and "Spaceport America Cup".

2021 AIAA Undergraduate Design Competition

The objective of the project is to design an affordable light attack aircraft that can operate from short, austere fields near the front lines to provide close air support to ground forces at short notice and complete some missions currently only feasible with attack helicopters. The intended entry-into-service is 2025.

Design Requirements

Criteria	Kestrel
Takeoff and Landing ≤ 4000 ft	Takeoff Distance = 708.9 ft Landing Distance = 496.2 ft
Survivability	redundancy, countermeasures, etc.
Payload	3000 lbs of armament
Weapon Provisions	missiles, rockets, 500 lb bomb
Integrated Gun	M-197 Gatling
Service Life	$> 15,000$ hours over 25 years
Service Ceiling $\geq 30,000$ ft	38,816 ft
Crew	Two, both with ejection seats

Design Approach

The A-29 Super Tucano and AT-6 Wolverine already meet the requirements and are in production. The door is open for a new and unique light attack aircraft that offers greater versatility and mission flexibility. A concept down-select led to a tiltwing configuration as the preferred concept. Custom Matlab scripts implementing methods from aircraft design textbooks were used to perform sizing analysis. Aerodynamics was assessed with NASA's VSPAero software and DARcorporation's FlightStream. Propulsion was modeled using GasTurb and structures was modeled using SolidWorks. Mission performance was analyzed with NASA's Flight Optimization Software (FLOPS). Estimates of cost were generated with DARcorporation's Advanced Aircraft Analysis (AAA). The engines were sized for vertical takeoff and landing (VTOL) at only 60% payload

Final Design

FlightStream Simulation

SolidWorks Fatigue Analysis

GE T700 Engine (1870

Key Performance Parameters

Gross Weight	14,169 lbs
Operating Empty Weight	9156 lbs
Block Fuel Burn	1795 lbs
Block Time	5.01 hours
Wing Area	245 ft ²
Maximum Lift-to-Drag Ratio	12.9
Top Speed	393.7 mph
Specific Fuel Consumption	0.43 lbm/hp/hr
Acquisition Cost	\$25.75 M
Operating Cost	\$3601/hr
Life-Cycle Cost	\$3.987 B

Primary Mission Objectives

1. Detect and identify snow-covered, ice-covered or dry roadways in Virginia via remote sensing
2. Effectively distribute measured data to roadway users, first responders, and roadway managers in order to improve roadway efficiency and safety

Weather Impacts on Virginia's Roadways

Comparison of wavelengths of light needed to detect road accumulation of snow compared to background.

Inclement Weather:

- Few traffic navigation devices include weather data in routing ¹
- Real time data (via road signs) helped reduce accidents in Oregon ²

Wet Pavement and Precipitation:

- Highest proportion of weather-related accidents ³
- Rain intensity positively correlated with traffic slowdowns ⁴
- Snow varies greatly between the coast and mountains ⁵

6U CubeSat Concept

Impact

- A spacecraft design to observe road conditions to improve safety and reduce costs of roadway monitoring
- Multi-disciplinary collaboration as part of MITRE's University Innovation Exchange (UIX)
- Student experience in program management, design, and defining customer needs

Majors Night

ENGINEERING

Who are we?

- Design, Build, Fly custom RC aircraft
- Compete in SAE AeroDesign
 - Competitive ruleset and guidelines
 - Takes place in Texas or Florida!
- We strive to be exciting, innovative, and performance-driven!

SCHOOL of ENGINEERING
& APPLIED SCIENCE

Project Breakdown: Design, Build, Fly

- Design
 - Using classroom knowledge, computer-aided design, computational analysis and real life experimentation to design the best possible airplane while adhering to competition rules
- Build
 - Using advanced machinery and tools to build a high fidelity airplane.
- Fly
 - Understanding the airplane and making appropriate changes to increase the airplane's performance

Learning Opportunities

- As a member of this club, you will learn important industry skills such as:
 - Solidworks
 - FEA/analysis
 - MDO
 - How to design
 - Manufacturing

SHAPING THE FUTURE OF AEROSPACE

What is the AIAA

- American Institute of Aeronautics and Astronautics is a professional society for the field of Aerospace Engineering
- Holds annual design competitions to provide real-world design experience for engineering students
- Hosts many conferences and smaller events

AIAA Chapter at UVA

- AIAA takes part in community activities such as Aero Day and UVA Engineering Open House
- Worked within the local Aerospace Community to write papers for submission at national conferences
- We plan other events (such as social events) to generate a better community within AE

Sigma Gamma Tau

NATIONAL HONOR SOCIETY IN AEROSPACE ENGINEERING

Spring 2022

CURRENT OFFICERS

- **FACULTY ADVISOR: Professor Chris Goyne**
- **PRESIDENT: Miriam Morse**
- **VICE PRESIDENT: Aaron Osborne**
- **TREASURER: Jason Nguyen**
- **SECRETARY: Dylan Tran**

ABOUT

- **NATIONAL AEROSPACE HONOR SOCIETY**
- **OBJECTIVES**
 - **TO RECOGNIZE AND HONOR THOSE INDIVIDUALS IN THE FIELD OF AERONAUTICS AND ASTRONAUTICS WHO HAVE, THROUGH SCHOLARSHIP, INTEGRITY, AND OUTSTANDING ACHIEVEMENT, BEEN A CREDIT TO THEIR PROFESSION**

WHO IS ELIGIBLE?

- **DISTINGUISHED SCHOLARSHIP**
- **MUST HAVE COMPLETED AT LEAST 3 SEMESTERS OF WORK TOWARDS A BACHELOR'S DEGREE**
- **REQUIREMENTS**
 - **TOP 1/3 OF 4TH YEARS**
 - **TOP 1/4 OF 3RD YEARS**
 - **TOP 1/5 OF 2ND YEARS**

WHAT DO WE DO?

- **UVA AIAA A.E.R.O. DAY (AEROSPACE ENGINEERS REACHING OUT)**
- **2ND YEAR AEROSPACE ENGINEERING INFO SESSION**
 - **PROVIDED OPPORTUNITY FOR 2ND YEARS TO MEET AERO MAJORS AND ASK QUESTIONS ABOUT MAJORING IN AEROSPACE ENGINEERING**
- **MAE TUTORING PROGRAM**
 - **PROVIDE TUTORS FOR 2ND AND 3RD YEAR AEROS**
- **COFFEE FOR MAE LOUNGE**
- **MAE Student Council**

REASONS TO JOIN

- **IT'S AN HONOR: YOU REPRESENT THE TOP OF YOUR CLASS**
- **ABILITY TO FORM CONNECTIONS WITH CLASSMATES AND PROFESSORS**
- **ONCE YOU JOIN, YOU ARE A MEMBER FOR LIFE**
- **EXCLUSIVE SCHOLARSHIP OPPORTUNITIES**
- **LEADERSHIP OPPORTUNITIES AND RESUME-BOOSTER**

The Aviation Club at the University of Virginia

Alex Poley, Christopher Recupero, Miles Beam

Meet the Board

Our Goals

- Expose members to the various facets of aviation
- Teach basic concepts of flight
- Provide resources to aspiring and prospective pilots
- Foster a community of aviators and aviation lovers

What Can You Expect from Joining?

- Use of the flight simulator lab
- Movie screenings and facilitated discussions
- Guest speakers from the aviation industry

What Can You Expect from Joining?

- Field trips to local airports and airshows
- Ground schools for FAA Private Pilot and Instrument Rating written exams (planned for next semester)
