

## **Creating a heatmap in MEV**

MeV software available for download here:

<https://sourceforge.net/projects/mev-tm4/files/mev-tm4/>

1. Open MeV.
2. Under the File menu, select Load Data.
3. Select Browse and choose the tab-delimited text (txt) file containing the data you wish to display as a heatmap.
4. Click the load button.
5. Under the display menu select color scheme to choose the color scheme.
6. Under the display menu select set color scale limits to adjust the upper and lower limits.
7. To save the heatmap, select Save Image as a tiff.
