Design a better world

The world needs heroes like you! Come learn about how your choices can help or hurt the earth. We will use design thinking to brainstorm and test new ways to preserve our environment! We will focus on topics such as food, fashion, and saving the rainforest. Activities may include designing a mini greenhouse, creating recyclable art, and building your own compost bin. (Since this is a sustainability class, most materials for projects you will likely already have in your house!)

This class will be 1 week long and appropriate for 5th-6th grade students.

Taught by:
Erin Barrett (ekb6ee@virginia.edu; 732-856-1482)
Shannon McGrath (sm9nf@virginia.edu; 571-484-2884)
