STOP THE CONTAGION: AN INTRODUCTION INTO INFECTIOUS DISEASES

A one week class for kids in grades 9-12!

CLASS OVERVIEW
Starting with how we become infected and ending with how we fight them off, this class is a great introduction to how diseases work!
Time is also dedicated to an in-class discussion about medical ethics, bioterrorism, and more!
Activities include demonstrations about antibiotic resistance, homemade models to show innate immunity, and a role playing game where you get to be the doctor!
