

FUNDAMENTALS OF CAD COURSE

Have you ever wished you could design an object to 3D print? During this week-long course, you will learn the fundamentals of computer-aided design using Autodesk Fusion 360! No prior experience required- we will start at square one and walk you through everything you need to know to get to designing your own objects!

Through fun workshops and daily demonstration activities, we will show you the ropes of Fusion 360. By the end of the week you will create your own unique design that we will 3D print and ship to you! This course is best suited for grades 9-12.
