Business and Technology Leadership in Engineering

Catherine T. “Katie” Hunt, Ph.D.

Brenton S. Halsey Distinguished Visiting Professor, UVA, Charlottesville, VA
Former R&D Director Innovation Sourcing and Sustainable Technologies, The Dow Chemical Company
and Past President, American Chemical Society

“Engineering, Teamwork, and Leadership ... enroll, engage, and EXCEL!”

ENGR 4880 is different from the analytical engineering and chemistry courses that you have been taking for the past few years. You will be challenged to engage in perhaps unfamiliar ways. The skills you learn, once you engage, will enable you to transition more smoothly into the world of work and to move forward more purposefully in your career. The course is organized around four topics:

I. Communicating Effectively,
II. Crafting Your Own Career,
III. Leading Change from the First Pitch, and
IV. Leading – Globally, Ethically and Strategically
